9th June 2014

Network Box is proud to announce a strategic partnership agreement where Jardine OneSolution (JOS) will become Network Box an authorized reseller in Hong Kong, offering comprehensive cyber security to SMEs.

“JOS’ wide range of Managed Services is designed specifically to provide our clients with the means and services necessary to stay maximally competitive amidst a constantly changing business and marketplace environment. Now, not only can we comprehensively help manage our client’s IT operations needs, we can add real-time 24/7 security operations monitoring capabilities to give them even greater peace of mind that their business is well protected.”

Mark Lunt
 Chairman, JOS

“The ability to pre-empt a new attack before it becomes a major problem is a tremendous advantage. As soon as a server update is ready, all our systems, regardless of their location or threat exposure, will be made current within 45 seconds. The greater the delay, the greater the potential for damage. All this happens automatically and transparently to the customer. Working with JOS gives us an opportunity to bring these benefits to an even greater range of customers.”

Michael Gazeley
 Managing Director, Network Box

With more than 60 years of solid experience, Jardine OneSolution (JOS) is one of the region’s leading IT products and distribution services companies, covering 12 locations in major business hubs in Hong Kong, Mainland China, Macau, Singapore and Malaysia. JOS is committed to “Creating Value Through Service” to our business partners and customers in Asia.

Network Box Corporation is a multi-award winning Managed Security Services Provider, specialising in Unified Threat Management Plus (UTM+). Network Box continuously defends the networks of its customers using patented PUSH technology, to continually update protection, from 13 Security Operations Centres spread across the globe in an average time of under 45 seconds.
