MANAGED SECURITY

# Managed Security Services Overview

■ Network Box services are available on customized 64-bit hardware or cloud-based virtual platforms

**Network Box is a leading global Managed Security Service Provider (MSSP), offering businesses of all sizes, world-class cyber protection that is effective and affordable.**

## The Network Box approach

We work alongside with you to manage your business risk from cyber threats. With Network Box, we do not just merely provide you with the hardware, we also fully manage your cyber security. Meaning, once we install your device, we remotely manage, monitor and protect your network from cyber threats 24 hours a day, 7 days a week, 365 days a year. Thus ensuring your network is constantly protected, and allowing you to concentrate on running your business.

This unique approach is offered via our triple ISO Security Operations Centre (SOC) running our consolidated technology platform. Network Box has 16 networked SOC's around the globe, across five regions.

## Award-winning technologies

We address both **incoming** threats from the Internet (e.g. intrusion attempts, zero-day threats, infection by trojans, viruses and other malware, spam, denial of service, etc.), and **outgoing** threats from your business (e.g. by blocking leakage of important information, denying access to non-work related or undesirable web sites and applications, etc.).

These technologies have allowed Network Box to win more than 90 international awards, including three Gold Awards from Silicon Valley.

## Industry recognised

- Recognised by Frost & Sullivan as a global leader in the Cyber Security landscape
- Named as a Strong Performer in the Forrester Wave<sup>1</sup>
- Listed as one of only fifteen Notable Vendors in the Gartner, Asia/Pacific Context: Magic Quadrant for Global MSSPs<sup>2</sup>
- Featured on the covers of PC TODAY and PROCESSOR magazines
- The only dedicated MSSP which is also a fully certified Microsoft Active Protections Program (MAPPP) partner

Network Box analyses over 800 million statistical data packets each day, in order to properly monitor cyber threats. We also cooperate with more than 70 security partners, to share threat intelligence, and operate over 250,000 virtual honey-pots deployed in the cloud. This global intelligence gathering enables us to stay ahead of the game. So if there is a new threat detected, we can automatically PUSH out security patches, via our 16 SOC's across the globe. Our patented PUSH technology allows every Network Box device in the world to be updated in an average time of **less than 45 seconds**.

Network Box is the only Security Service Provider that offers real-time PUSH updates. Currently, Network Box is PUSHing out 18,076 updates a day.

Network Box HQ's ISO 9001 / ISO 20000 / ISO 27001 certified Security Operations Centre, ensures your network stays constantly protected 24x7x365.

Accountable service levels, planned implementation, customer training, service desk support, and account management are all part of the customer relationship experience. The Network Box team complements your resources with trained security analysts monitoring and managing the Network Box cyber protection services.

## Business benefits

- **Significantly reduced business risk:** continuous reduction in risk from cyber attack
- **Improved business continuity:** multiple pathways to achieve resilience
- **Productivity gains:** management of internet use through policy control
- **Lower TCO:** cost reduction via consolidation and outsourcing to the experts
- **Improved use of internal resources:** customers can focus on their core business
- **Financial efficiency:** efficient use of resources, expensed via OpEx rather than CapEx
- **Accountable service:** guaranteed service performance via accountable service levels
- **Scalable:** solutions able to grow with customers' business, not constrain the business
- **Simplified security:** achieved by visibility, management and control

## Network Box Company Profile

### History of service:

Over 14 years of managed security services, globally proven

### Independently validated:

- Won over 90 global awards
- Triple ISO Certified Security Operations Centre
- 100% effective against Tolly Group's Extended Wildlist Malware, over HTTP, POP3 and SMTP protocols
- IPv6 Core Phase 2 certified

### Security partners:

70+ global partners including:  
Microsoft Active Protections Program (MAPP),  
Kaspersky Labs, Clam AV, CVE MITRE

## Cyber security with a difference

- **Fully managed cyber security service:** it looks like a product, but it is actually a service offering a greater number of business benefits
- **Highest resilience:** multiple pathways in both network infrastructure and SOC teams
- **Ability to leverage deep skills:** access to the teams that built the protection system
- **True real time updates:** Network Box's patented PUSH technology
- **Comprehensive set of tools:** breadth and depth of cyber defence
- **Consolidated platform:** integrated management of the comprehensive tools
